

Storm Water – Annual Jet and Vactor of PW Storm water System

1. Preparation
 - a. Train all Storm Water Staff how to operate Vactor Truck.
 - b. Create an up to date map of all storm drain infrastructure on property.
 - c. Create service order annually (preferably during early spring)

2. Process
 - a. With and up to date map of the storm drain system identify all pipes, inlets, man holes, and any other storm drain infrastructure.
 - b. Jet and vactor all pipes, inlets, and man holes.
 - c. Inspect system for functionality

3. Response
 - a. After all work is complete, fill out service order and notify storm water specialist that all work has been completed.
 - b. If any damage is found during work notify Public Works Director and Storm Water Specialist
