

# Which Snake is Which?

There are 31 species of snakes in Utah but only 7 of these are venomous. Some non-venomous snakes will mimic venomous snake behaviors, like rattling their tails. Leave all snakes be!

## Test your skills

### EYES

Venomous snakes have elliptical pupils like a cat.  
Non-venomous snakes have a rounded pupil.

### HEAD

Venomous snakes have a triangular head shape.

### TAIL

The underside of venomous snake has 1 set of scales. A non-venomous snake has 2.

### NOSE

Utah Pit Vipers have a pit between the nose and the eyes.
