

# TRANSPORTING EQUIPMENT

## 1. Preparation

- a. Determine equipment needed for transport and method (trailer, truck bed) needed to transport equipment.
- b. Conduct pre- trip inspection of equipment to ensure any loose material is removed, that there are no leaking fluids and all equipment is secure.
- c. Make sure dirt and debris that may fall from equipment is removed before transport.

## 2. Process

- a. Load and secure equipment on trailer or truck.
- b. Load and secure fuel containers for equipment usage.

## 3. Clean-up

- a. Clean up any spills following the SOP **“Chemical Handling & Transporting and Spill Response”**
- a. Off load equipment.
- b. Store equipment and trailer in proper location.
- c. Conduct post-trip inspection of equipment.
- d. Wash equipment, if needed, according to the SOP **“Vehicles-Washing”**

## 4. Documentation

- a. Report any leaks, defects or other problems to immediate supervisor that are noticed during pre- or post-trip inspections.
